In the Claims:

This listing of the claims replaces all prior and previous versions.

1.   (Canceled)

2.   (Canceled)

3.   (Currently Amended) A retrieved telephone number displaying method for a portable telephone set for retrieving telephone numbers and other data registered in the portable telephone set and displaying the retrieved data in a display of the portable telephone set, wherein the data retrieved are displayed in a predetermined sequence together with ~~the~~ a total number of cases of the retrieved data, the total number of cases being a number of times a number represented by an item of the retrieved data called the portable telephone set and was called by the portable telephone set, wherein the data retrieved in the predetermined sequence is data retrieved by a Japanese 50-kana sequence retrieval method, a kana affixing retrieval method, a group retrieval method or a telephone number inputting retrieval method; when a designated sequence of display is a sequence of greater number of times of utilization, the display sequence is also of the greater number of times of utilization.

4. – 5. (Canceled)

6.   (Currently Amended) A retrieved telephone number displaying system for a portable telephone set for retrieving telephone numbers and other data registered in the portable telephone set and displaying the retrieved data in a display of the portable telephone set, wherein the data received are displayed in a predetermined sequence together with ~~the~~ a total number of cases of the retrieved data, the total number of cases being a number of times a number represented by an

item of the retrieved data called the portable telephone set and was called by the portable telephone set, wherein the data retrieved in the predetermined sequence is data retrieved by a Japanese 50-kana sequence retrieval method, a kana affixing retrieval method, a group retrieval method or a telephone number inputting retrieval method; when a designated sequence of display is a sequence of greater number of times of utilization, the display sequence is also of the greater number of times of utilization.

7. – 8. (Canceled)

9.   (Currently Amended)   A portable telephone set comprising a ~~CPU, a memory for storing such data as telephone numbers and names, and~~ a display for ~~storing the stored data, wherein the CPU retrieves the data stored in the memory in~~ a predetermined sequence, and displays the data retrieved in a predetermined sequence together with ~~the~~ a total number of cases of the retrieved data, the total number of cases being a number of times a number represented by an item of the retrieved data called the portable telephone set and was called by the portable telephone set, wherein the data retrieved in the predetermined sequence is data retrieved by a Japanese 50-kana sequence retrieval method, a kana affixing retrieval method, a group retrieval method or a telephone number inputting retrieval method; when a designated sequence of display is a sequence of greater number of times of utilization, the predetermined display sequence is also of the greater number of times of utilization.

10.   (Currently Amended)   The method of claim 3, wherein the data retrieved in the predetermined display sequence is arranged in ~~a~~ the sequence of greater numbers of times of

utilization and displayed in the sequence of the greater number of times of utilization together with the total number of cases of the retrieved data.

11. **(Currently Amended)** The system of claim 6, wherein the data retrieved in the predetermined display sequence is arranged in a the sequence of the greater numbers of times of utilization and displayed in the sequence of the greater number of times of utilization together with the total number of cases of the retrieved data.

12. **(Currently Amended)** The apparatus of claim 9, wherein the data retrieved in the predetermined display sequence is arranged in a the sequence of the greater numbers of times of utilization and displayed in the sequence of the greater number of times of utilization together with the total number of cases of the retrieved data.
